

STREET ART INSTALLATION

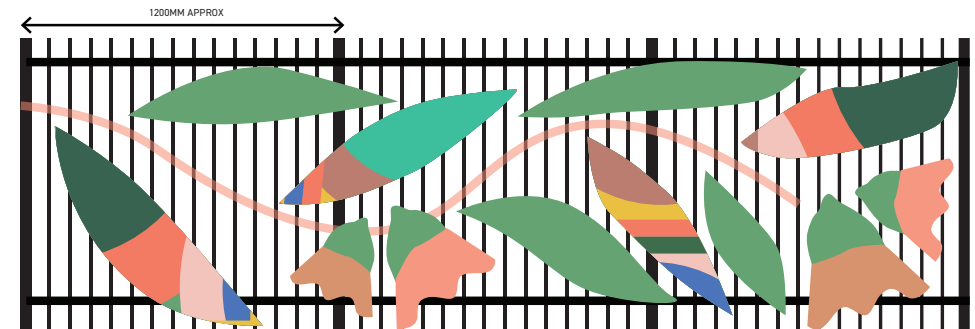

The concept design for the street art design is inspired by the shapes created by the wheels of the bikes that travel through Norman Terrace.

Council intends to collaborate with local residents to help paint these designs on the street as part of a temporary art installation.

Colour palette

FENCE ART INSTALLATION

The design for the fence art responds to the native South Australian Blue Gum (*Eucalyptus leucoxylon*). The fence art will illustrate the distinct long leaves of the SA Blue Gum and an interpretation of the clusters' peachy-pink flowers. Each leaf celebrates the 'Living Streets' principles of more colour and interests as well as celebrating the increased greenery in the area.

Council intends to work with local primary school students where they can express their artist flare and interpretation of the environment.
